# LED Strip Lights

## Peterson's new 358 Series adds surface-mount versatility to our line of LED cargo area lighting

Peterson's line of innovative USA-made LED interior lighting with the 358 Series—a lower-profile, flat-back bar light ideal for surface mounting to any trailer center ceiling, sidewall, or utility tool compartment. The versatile 358 Series is patented to meet the interior lighting needs of cargo and utility bodies built with floor-to-ceiling storage systems along

the sidewalls, where lights designed for upper corner mounting won't fit. Our 358 lights feature an integral molded seal that's designed to provide IP67-rated protection from dust, moisture, and vapors. Suitable for both interior and exterior use. All three models work with Peterson's exclusive 5600 Series timer box switch.

**300 to 1,000 Lumens**

### 358 LED Strip Light

- Available in 6", 12" and 18" lengths.
- Easy and versatile surface screw mounting; ideal for center ceiling mount in step vans and service bodies.
- Multi-volt design is compatible with both 12V and 24V systems.
- Available with either stripped leads or terminated with .180 bullets.
- Integral molded seal resists dust, moisture and vapors.
- Optional timer switch available separately.
- 18-inch version available with wires at both ends for daisy-chaining lights together.
- Designed to meet IP67 ingress protection rating.

Optimized profile and flat mounting tabs on both ends easily screw-mount to flat surfaces.

See our Master Catalog or PMLights.com to learn more about our 5600 series timer switch – the perfect companion to our LED interior lights!
