Timer Box Switch

Peterson Expands 5600 Timer Switch Line-Up

Peterson is excited to announce the expansion of our 5600 timer box series, an ingenious control system for interior lights. These sealed, solid-state electronic control units provide flexible, efficient switching of LED lights in a convenient, compact, easily installed product designed to handle the temperature swings of vans and service bodies as well as the high humidity of reefer trailers. Both flush-mount and surface-mount versions are available.

A single push of the 5600's sealed membrane button provides timed illumination, then automatically shuts off. Two minutes prior to turning off, the system thoughtfully provides a "curtain call" warning by momentarily dimming the lights. The power-on time can be extended by pressing the button again at any time. Lights can be turned off immediately by simply pressing and holding the button. The 5600 and 5603 model switches will accept up to four button pushes, extending the lights-on time in 30-minute increments up to a total uninterrupted illumination time of 2 hours. Refer to the chart below for the various configurations available.

These switches pair perfectly with Peterson's ground-breaking 359

series "cove light" interior LED units. The 5600's circuitry handles 10 amps maximum load, which is robust enough handle up to 12 daisy-chained 359-3 cove lights, for 12,000 total system lumens!

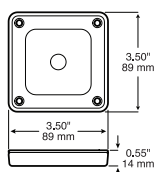

5600 Timer Box Switch

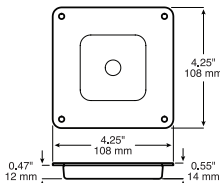

- 10 amp maximum load.
- Pre-programmed for 30, 60, or 90 minutes of ON time per button push.
- 5600 and 5603 versions can be programmed for up to 2 hours of constant ON time by pressing the button up to 4 times (30 min added per push).
- Additional time can be added at any time, up to maximum.
- Lights flash per button push to indicate that command is received.
- Pushing and holding button turns off lights at any time.
- "2 minute warning" slowly dims and raises light level prior to shut-off.
- 9-32 volt operating range.
- Must be used in conjunction with 10 amp fuse for circuit protection.
- 5603 is similar to 5600, but has separate bullet connectors rather than unified plugs.

The 5600 timer switch is designed to integrate with Peterson's innovative 359 series "cove lights" to create the most advanced, efficient cargo illumination system on the market.

Surface Mount
5600, 5602, 5603

Recessed Mount
5600-1, 5601

Two Bullet Connector Styles

5600, 5601, 5602

5603

Order No.	Description	Interval	Max Time	Pack	Std Carton
P5600	surface	30 min	120 min	poly pack	12
P5600-1	recessed	30 min	120 min	poly pack	12
5600	surface	30 min	120 min	mfg. pack	50
5600-1	recessed	30 min	120 min	mfg. pack	50
5601	recessed	60 min	60 min	mfg. pack	50
5602	surface	90 min	90 min	mfg. pack	50
5603	surface	30 min	120 min	mfg. pack	2
