U925-12 LIGHTS FOR THE BRIGHT LEVEL OF PROTECTION

\$8.99
BLOWOUT SALE
PRICE

The U925-12 features a frosted lens with 12 powerful LEDs, making it ideal for task lighting in tight or low-clearance spaces. Designed with a voltage-regulated circuit, it operates reliably across a wide 9–32V range. The sealed lens and housing meet IP67 ingress protection standards, ensuring performance in wet, dusty, or demanding environments. Its slim profile and grommet design allow for easy installation in panels up to 6 mm thick.

Mounting grommets and surface brackets are available for added flexibility. See accessory options on the back of this flyer.

U925-12
